

RALLY SITE SAFETY CODE

No vehicles permitted to enter the rally field after 9.30am and no late entries accepted.

The machinery and equipment on site can pose a very real safety hazard to any person.

The committee of the Farm Machinery Preservation Society (F.M.P.S.), recognizes the hazards which may exist and has prepared this SAFETY CODE for your guidance.

The object of this code is to set MINIMUM standards for the conduct of operating machines and equipment.

To be aware that the majority of the public have no experience of the machines.

To be aware that common sense, experience and 'self policing' of events do not cover specific safety requirements, so a written safety code of practice is vital for uniformity and protection.

Equipment and vehicles on rally site

There is to be no movement of vehicles with a design speed above 8mph on the rally field between 10.00am and 5.00pm. Service vehicles have Stewards and are exempt

Owners of equipment with electric starters must ensure it cannot be started by accident. Remove keys when the machine is not attended.

Care should be taken when reversing or attaching loads, especially in public areas.

Loading and unloading of equipment must be carried out only before 9.30am and after 5.30pm.

It is advised that chain or bar be used for any towing, and then only away from the public and authorization must be obtained from a steward.

Generators must have and use an earthing stake and be certified electrically safe.

Only persons in possession of a current driving license for the class of vehicle concerned may drive, * Vehicles must only move at walking pace The Stallholder or his representative must ensure that no person be allowed to climb on moving vehicles. Vehicles may only carry the number of passengers they were originally designed for and these must be correctly seated.

Follow Stewards instructions when requested. Belligerence or dissent is not acceptable.
